E-Mobility Gateway, keyed alike 310561 width 250mm, height 100mm, depth 250mm, E-Mobility Gateway, keyed alike for intelligent networking of charging systems and for connection to backend systems. With the MENNEKES eMobility gateway, various MENNEKES charging systems can be networked (e.g. premium charging stations, premium wall charging stations, AMTRON Premium). Up to 16 charging points can be networked per gateway via RS-485 bus (topology: line). Integrated charging and load management: - guarantees operational reliability - increases the availability of the charging points - avoids costly power peaks If there is not enough mains connection power available, the charging currents of the connected charging points are reduced. Further charging management functions: - Downgrade input for the grid connection current - Charging end/charging pause detection - VIP charging (only with local networking) With local networking: - local whitelist - local transaction list for backend networking: - Communication via mobile communications (SIM- Card not included) - alternative communication via LAN - protocol OCPP 1.5 The device is intended for fixed installation indoors and outdoors. The plastic housing can be locked with a key. The locking is identical for all gateway housings (keyed alike). Optionally, a variant with a different closure can be ordered.
