IO module for Siedle Vario MX-OPT-IO1, mounting type=other, suitable for: T2x, offers extended connection options to the door station (e.g. bell buttons, light, garage door opener, etc.) - The IO module is connected via MxBus to the Camera module attached and connected to the network. It has 8 physical switching inputs which, in AC operation, make it possible to distinguish between an applied full or half wave. It is thus possible to connect two buttons to each switching input terminal and thereby implement 16 button inputs. The inputs can B. be used for bell buttons. The outputs for external consumers such as a door chime, or external lights or garage door drives via power relays

* Note on delivery time: Day = Monday to Friday, no public holiday in Bavaria or Saxony. Goods are also delivered on Saturdays (DHL).

** Payment methods may vary from country to country. All prices plus shipping and excluding customs duties or other additional costs (import sales tax) for deliveries outside the EU.

*** Savings compared to RRP = the manufacturer's recommended retail price. RRP is the price recommended to retailers by the manufacturer, importer or wholesaler as a resale price to the customer. The RRP is also referred to as the list price and is defined as the highest possible price that a buyer would pay for a specific product before any discounts (Source of gross list prices: Germany).
