The SITOR fuse system from Siemens, an important part of the SENTRON protection components for electrical installations, offers effective device and system protection to people through safe shutdown in the event of an overload or short circuit. The area of application also includes frequency converters with fuses in the input and DC link as well as UPS systems and soft starters for motors. The Siemens SITOR fuses are characterized above all by: 1. Super fast switch-off characteristics compared to conventional NH fuses. 2. Power semiconductors are also reliably protected in the event of a short circuit. 3. The Siemens quality standard ensures very good characteristic curve fidelity. 4. SITOR cylinder fuses are approved according to IEC and UL and mostly also CCC and can therefore be used worldwide. 5. Partially suitable for installation in NH fuse bases, in NH fuse switch-disconnectors and switch-disconnectors with fuses.
