EIB power supply 640mA SV/S 30.640.3.1 bus system KNX, other bus systems without, mounting type REG, width in modular units 4, with LED display, number of integrated chokes 1, number of lines that can be supplied 2, max. output current 640mA, secondary voltage 30V. The KNX power supply 640 mA generates and monitors the KNX system voltage (SELV). The bus line is decoupled from the power supply with the integrated choke. The voltage output is short-circuit-proof and overload-proof. The two-color LED indicates the status of the device. The device has an additional short-circuit-proof and overload-proof 30 V DC voltage output. This can be used to feed another bus line (in conjunction with a separate choke). The power supply has a wide-range input for the supply voltage in the range of 85...265 V AC, 50/60 Hz.

* Note on delivery time: Day = Monday to Friday, no public holiday in Bavaria or Saxony. Goods are also delivered on Saturdays (DHL).

** Payment methods may vary from country to country. All prices plus shipping and excluding customs duties or other additional costs (import sales tax) for deliveries outside the EU.

*** Savings compared to RRP = the manufacturer's recommended retail price. RRP is the price recommended to retailers by the manufacturer, importer or wholesaler as a resale price to the customer. The RRP is also referred to as the list price and is defined as the highest possible price that a buyer would pay for a specific product before any discounts (Source of gross list prices: Germany).
