Switching power supply 12V/12W FSNT14-12V/12W Type of voltage of the supply voltage AC, 1. Output voltage 12 ... 12V, max. Power output 12W, stabilized, design of the electrical connection screw connection, DIN rail mounting possible, suitable for series installation, width in modular units 1, installation width 18mm, width 18mm, height 58mm, depth 58mm, degree of protection (IP) IP20, switching power supply. Standby loss only 0.2 watts. If the total power requirement of a Series 14 bus system is higher than 8W, additional switching power supplies are required. These must not be connected in parallel, but each supply a group of actuators, which are separated with a separator on the FSNT14. The scope of delivery includes 1 separating bridge TB14 1 HP, 1 jumper 1.5 HP and a spacer DS14. With a load greater than 50% of the nominal power and always with switching power supplies and dimmers lying next to each other, a 1/2 module ventilation distance with the spacer DS14 is required. This and a long jumper are therefore included. Efficiency 83%. Stabilized output voltage plusminus1%, low residual ripple. short-circuit proof. Overload and overtemperature protection by switching off with automatic switching on after the error has been eliminated (auto recovery function). This switched-mode power supply can also be used to create redundancy. For this, only 1 FSNT14 may be connected in parallel to the integrated power supplies in the FAM14 and FTS14KS and connected with a normal jumper. The FSNT14 should be placed next to the last actuator in the bus for optimal load distribution.

YOUR ADVANTAGES

WORLDWIDE TRADE

Corporate video eibmarkt[®]

COMPLAINTS HANDLING

Obliging and 100% safely

SHORT DELIVERY TIME

Warehousing

99% CUSTOMER SATISFACTION

* Note on delivery time: Day = Monday to Friday, no public holiday in Bavaria or Saxony. Goods are also delivered on Saturdays (DHL).

** Payment methods may vary from country to country. All prices plus shipping and excluding customs duties or other additional costs (import sales tax) for deliveries outside the EU.

*** Savings compared to RRP = the manufacturer's recommended retail price. RRP is the price recommended to retailers by the manufacturer, importer or wholesaler as a resale price to the customer. The RRP is also referred to as the list price and is defined as the highest possible price that a buyer would pay for a specific product before any discounts (Source of gross list prices: Germany).
