Wireless actuator impulse switch. FSR61-230V Suitable for pulse pushers, Suitable for switches, In the housing, 230 V AC power supply, Push-button operation, Switching operation, Number of relays 1, Flush-mounting type, Material plastic, Material quality thermoplastic, halogen-free, Other surface, Design of the surface matt, other type of attachment, color blue, suitable for degree of protection (IP) IP20, radio frequency 868MHz, rolling code system, number of commands 32, 1 potential-free NO contact 10A/250V AC, 2000 watt light bulbs, switch-off delay with switch-off early warning and button permanent light can be switched on. Encrypted radio, bidirectional radio and repeater function can be switched on. Standby loss only 0.8 watts. For flush mounting. 45mm long, 45mm wide, 33mm deep. If the supply voltage fails, the switching status is retained. When the supply voltage returns, it is switched off in a defined manner. After installation, wait for the brief automatic synchronization before the switched consumer is connected to the mains. In addition to the radio control input via an internal antenna, this radio actuator can also be controlled locally with a conventional control button that may be installed in front of it. A glow lamp current is not permitted. Encrypted sensors can be taught in. Bidirectional radio and/or a repeater function can be switched on. Each status change and received central control telegrams are then confirmed with a radio telegram. This radio telegram can be taught into other actuators, the GFVS software and into universal displays. Scene control: Several FSR61 can be switched on or off for a scene with one of the four control signals of a button with double rocker that has been taught-in as a scene button. With the upper rotary switch in the LRN position, up to 35 wireless pushbuttons are assigned, one or more of which are central control pushbuttons.
