Bus display time switch RS485 FSU14 bus system radio bus, other bus systems without, radio bidirectional, daily program, weekly program, yearly program, astro program, mounting type REG, width in modular units 1, external programming, number of channels 8, presence simulation, summer/winter time, with bus coupling, power reserve 480h, degree of protection (IP) IP20, display time switch with 8 channels for the Eltako RS485 bus. With astro function. Standby loss only 0.1 watts. Connection to the Eltako RS485 bus, bus cross-wiring and power supply with jumper. In order for this timer to function, it is necessary for the radio antenna module to assign a device address, as described in the operating instructions. The switching commands of the channels can be taught in bus actuators and radio actuators. Up to 60 timer memory locations are freely distributed among the channels. With date and automatic summer/winter time changeover. Power reserve without battery approx. 20 days. Each memory location can be assigned either the astro function (automatic switching after sunrise or sunset) or the time function. The Astro switch-on or switch-off time can be shifted by plus/minus 2 hours. In addition, a time shift influenced by the solstices of up to plus-minus 2 hours can be entered. The timer is set using the MODE and SET buttons and the settings can be locked. See user manual for more information.
