Heating Actuator 4-fold, 2SU MDRC, 24-230VAC. Heating Actuator to control electrothermic valve drives. LED indicator for each channel. New generation with extended functionality. Each channel controls up to 4 electrothermic valve drives (230VAC). Free assignment of the outputs to the controller channel. Controllable with 1Bit (Switching/PWM) / 1Byte actuating variable or direct control with temperature value via KNX bus. Integrated PI temperature controller (Heating and Cooling). Comfort-, night- and frost protection. Summer-/winter operation. 1Bit +/-, 1Byte or 2Byte absolute object to set the given value. Setpoint values are stored at bus voltage failure. Emergency operation if cyclic actuating variable fails. Overload protection with fault message object (230VAC). Mains voltage failure detection with fault message object (230VAC). Objects for heating request and cyclic movement of the valves. Comprehensive scene functions. Compatible with many visualisations. Minimum flow temperature. Diagnostics for each channel with 14Byte plain text object. Quick application download (long frame support for ETS5).

* Note on delivery time: Day = Monday to Friday, no public holiday in Bavaria or Saxony. Goods are also delivered on Saturdays (DHL).

** Payment methods may vary from country to country. All prices plus shipping and excluding customs duties or other additional costs (import sales tax) for deliveries outside the EU.

*** Savings compared to RRP = the manufacturer's recommended retail price. RRP is the price recommended to retailers by the manufacturer, importer or wholesaler as a resale price to the customer. The RRP is also referred to as the list price and is defined as the highest possible price that a buyer would pay for a specific product before any discounts (Source of gross list prices: Germany).
