AFD unit B25 2-pole 230V 1TE 5SV6016-6KK25 type of voltage for actuation AC, mounting type DIN rail, design of the electrical connection screw connection, height 90mm, width 18mm, depth 68.5mm, AFD unit LS combination 230V, 6kA, 1+N, B, 25A compact (1TE) The FI switch is the residual current protective device for contact protection The patented residual current protective devices from Siemens are an important part of the SENTRON protective components for the electrical installation, because they prevent life-threatening electrical accidents by safely switching off dangerous residual currents to earth. Electrically ignited fires can be prevented as soon as they start. Whether by directly touching live parts during operation or by indirectly touching equipment - the protection is primarily achieved by switching off quickly. The main features of the Siemens 5SV RCCBs are: 1. Comprehensive protection for people and property against electric shock. 2. Whether sinusoidal AC residual currents or smooth DC residual currents - Siemens offers the right type and special versions for all requirements. 3. Reliable safety during installation thanks to the grip and touch protection included as standard. 4. Tool-free removal from the top-hat rail or from the busbar assembly through convenient slide-hand operation. 5. Data matrix code on the front of the device provides all information about the residual current circuit breaker quickly and easily. 6. Be protected according to standards: The residual current circuit breakers comply with the provisions of DIN VDE. 7. Optimum technology for your safety - only from Siemens. For the safe, efficient electrical infrastructure in buildings and industry, Siemens offers a comprehensive portfolio of protective switching, measuring and monitoring devices, distribution systems, switches and socket outlets.
