SIMATIC central module 225kB 6ES7511-1FK02-0AB0 supply voltage at DC 19.2... 28.8V, voltage type of the supply voltage DC, number of relay outputs 0, modular design, processing time (1K, binary instruction) 0.06ms, number of HW interfaces industrial Ethernet 1, number of interfaces PROFINET 1, number of HW interfaces serial RS-232 0, number of HW interfaces serial RS-422 0, number of HW interfaces serial RS-485 0, number of HW interfaces USB 0, Number of parallel HW interfaces 0 Number of wireless HW interfaces 0 Number of other HW interfaces 0 Number of analog outputs 0 Number of analog inputs 0 Number of digital inputs 0 Number of digital outputs 0 Supports protocol for TCP/IP, supports protocol for MODBUS, supports protocol for PROFINET IO, supports protocol for PROFIsafe, system component, with display, memory type other, memory size 1225kByte, DIN rail mounting possible, G suitable for safety functions, SIL according to IEC 61508 3, performance level according to EN ISO 13849-1 level e, explosion protection category for gas ATEX gas explosion protection, cat. 3G, explosion protection category for dust without, width 35mm, height 147mm, Depth 129 mm, SIMATIC S7-1500F, CPU 1511F-1 PN, central processing unit with work memory 225 KB for program and 1 MB for data, 1st interface: PROFINET IRT with 2-port switch, 60 NS bit performance, SIMATIC memory card required The Advanced Controller SIMATIC® S7-1500 sets standards in terms of system performance and usability. The seamless integration of the SIMATIC S7-1500 controller into the Totally Integrated Automation Portal (TIA Portal) offers advantages such as shared data management, a uniform operating concept and central services. This makes the use of general functions particularly easy. With its fast system response times, the controller ensures more productivity in no time at all. For you, this means more flexibility and a shorter time to market. Various CPU versions are available for the SIMATIC S7-1500, each in several performance classes. The portfolio includes standard CPUs, some with the option of integrating C/C++ code. The digital and analogue IOs are integrated in the compact CPUs, counter inputs and pulse outputs can be recorded directly on the CPU. The fail-safe CPUs allow standard and safety programs to run on the same controller. The technology CPUs expand the motion control functions available in all SIMATIC S7-1500 controllers for demanding solutions. The Advanced Controller SIMATIC S7-1500 is configured with the software SIMATIC STEP 7 Professional. A SIMATIC memory card is required to operate this module. Advanced Controller SIMATIC S7-1500 for complex automation tasks.

### YOUR ADVANTAGES

**WORLDWIDE TRADE**  
Corporate video eibmarkt®

**99% CUSTOMER SATISFACTION**  
> 500,000 customers worldwide

**DHL TRACK & TRACE**  
Shipment tracking

**COMPLAINTS HANDLING**  
Obliging and 100% safely

**25 YEARS OF EXPERIENCE**  
In worldwide mail order

**ORDER LIVE CHAT**  
With order history

**SHORT DELIVERY TIME**  
Warehousing

**REFUND**  
Within 14 days

**DATA PROTECTION**  
Guarantee

\* Note on delivery time: Day = Monday to Friday, no public holiday in Bavaria or Saxony. Goods are also delivered on Saturdays (DHL).

\*\* Payment methods may vary from country to country. All prices plus shipping and excluding customs duties or other additional costs (import sales tax) for deliveries outside the EU.

\*\*\* Savings compared to RRP = the manufacturer's recommended retail price. RRP is the price recommended to retailers by the manufacturer, importer or wholesaler as a resale price to the customer. The RRP is also referred to as the list price and is defined as the highest possible price that a buyer would pay for a specific product before any discounts (Source of gross list prices: Germany).
