PE feed-through terminal, front installation, accessories 3LD9340-3B Type of accessories other, PE feed-through terminal, front installation, accessories for 3LD3 switch disconnectors The 3LD main and emergency stop switch as a repair switch for safely switching off loads in a wide variety of environments. The possible uses of the 3LD network disconnection devices are diverse. After network disconnections, they ensure the safe isolation of all electrical equipment, for example switching three-phase motors as well as air conditioning and ventilation systems. 3LD have proven themselves in many areas, especially in processing machines in mechanical and conveyor system construction, in the chemical or in the food and beverage industry. The Siemens 3LD main and emergency stop switches are characterized above all by: 1. Modular design, quick and easy installation of auxiliary switches, N-PE terminal or 4th pole. 2. Versatile and can be used worldwide thanks to international IEC, UL and shipbuilding approvals. 3. Protection class up to IP 65 with encapsulated housing for outdoor applications. 4. Can be used for DC applications. 5. Mounting types: front mounting, mounting plate, top-hat rail. 6. Optimum mains isolation from 16 A to 250 A thanks to the rotary drive being lockable. Siemens offers a comprehensive portfolio of protection, switching, measuring and monitoring devices, distribution systems as well as switches and sockets for safe, efficient electrical infrastructure in buildings and industry.
