Monitoring module 176-250V 4-400W V-CG-SE 4-400W length 110mm, width 30mm, height 21mm, low operating costs due to reduced standby power loss < 0.5 W, for easier installation in narrow lights, without protective conductor connection. For use in luminaires of protection class I or II, variable mounting options for different installation positions (lying or sideways), avoiding installation errors thanks to reverse polarity-proof mains connection. Universal monitoring module for connected loads of 4-400 W. Shortened inspection effort thanks to CEWA GUARD and S+ technology: Automatic function monitoring of up to 20 lights per circuit. Reduced installation costs through STAR technology: Freely programmable mixed operation of the switching types per luminaire in one circuit. Reduced installation costs because no additional data line to the luminaires is required. Extended ambient temperature range, separate control input for parallel on-site switching with positive or inverted logic. Connection voltage 220+240V, 50/60Hz, max. permissible inrush current 30A, max. power length 50m (module light)

* Note on delivery time: Day = Monday to Friday, no public holiday in Bavaria or Saxony. Goods are also delivered on Saturdays (DHL).

** Payment methods may vary from country to country. All prices plus shipping and excluding customs duties or other additional costs (import sales tax) for deliveries outside the EU.

*** Savings compared to RRP = the manufacturer's recommended retail price. RRP is the price recommended to retailers by the manufacturer, importer or wholesaler as a resale price to the customer. The RRP is also referred to as the list price and is defined as the highest possible price that a buyer would pay for a specific product before any discounts (Source of gross list prices: Germany).
