Base load element PTC for installation GLE 70000008 Type of electrical accessory Resistor block Type of mechanical accessory Other A base load is used when loads cannot be identified due to their capacity, but are intended to switch on the mains voltage. Base loads must always go into operation in parallel with the associated consumer and be switched off with the same. Higher standby loads can impair or prevent the detection of a base load. Examples include: fluorescent lamps, dimmer circuits and electronic transformers. GLE PTC base load element in a small sleeve with connecting cables can be used directly in a consumer, switch or junction box. It is not able to keep the field disconnect switch switched on without an additional consumer.
