Code keypad alu Keyless In 260526 Other bus systems other, design code lock, flush-mounted installation, material plastic, material quality thermoplastic, surface other, design of the surface not applicable, color aluminium, protection class (IP) IP20, with bus coupling, Gira Keyless In code keypad color aluminium features : Installation in a device box. Stand-alone device or in combination with the Gira door communication system. In stand-alone operation, use of the integrated potential-free relay contacts for switching operations, e.g. B. for door openers with their own power supply (e.g. commercially available doorbell transformer). Commissioning through direct configuration without a PC or programming software. Inputs and outputs: Switch contact: Two relays with potential-free changeover contacts Load capacity AC DC 24 V 1.6 A. Two connections for power supply. Keypad as an access control system with a capacitive and therefore non-wearing keypad. No recognizable wear of frequently used combination of numbers. Stand-alone device or in combination with the Gira door communication system as a door call system for buildings with several residential units. Special key "C": Delete an incorrect entry. Special key "Key": Direct door opening after entering the correct code. "Bell" special key: Targeted selection of home stations in large buildings. Special button "F": switching functions with switching actuators of the Gira door communication system. Homogeneous blue LED illumination of digits and special characters at night. Master PIN number on enclosed sealed security card in case of loss of Administrator PIN number. The keypad can manage up to 255 codes. Up to 32-digit codes possible. Acoustic feedback when pressing a button. 3-color LED status display during programming and operation. Warning tone in the event of unauthorized removal of the keyboard attachment for sabotage detection. Sabotage circuit with switching actuator in the Gira door communication system. Two different codes can be assigned to the two integrated changeover relays, e.g. B. Code 1: Door opening, Code 2: Switching of the outside light. Inputs and outputs: connector strip connecting cable for Gira door communication system. Notes : The Keyless In devices can be connected to the Gira HomeServer with the DCS-IP gateway. This makes intelligent connections possible. So e.g. B. temporary or one-time access authorizations can be easily granted. All data, including access authorizations, can then be managed centrally and flexibly via the Gira HomeServer. Integration into profile 55 possible. The Gira AppShop is the marketplace for...
