Indicator light red E219-C48 color of the cap red, illuminant LED, lamp base other, max System status signalling. The different LED light colors of the devices allow a clear visualization. LED colors meanings (according to IEC 60073). The indicator lights find their place in all electrical systems (e.g. industry, building technology, trade, house installation). With the clear visualization of the current status of the electrical system or the equipment, they make a significant contribution to occupational safety. Due to the three different voltage ranges of the LEDs, the indicator light can be used universally.
