Code keyboard anth Keyless In 260528 Other bus systems other, code lock version, mounting type flush-mounted, material plastic, material quality thermoplastic, surface other, surface finish matt, color anthracite, protection class (IP) IP20, with bus coupling, Gira Keyless In code keyboard anthracite Features: Installation into a device box. Stand-alone device or in combination with the Gira door communication system. In stand-alone operation, use of the integrated potential-free relay contacts for switching operations, e.g. B. for door openers with their own power supply (e.g. standard bell transformer). Commissioning through direct configuration without a PC or programming software. Inputs and outputs: Switching contact: Two relays with potential-free changeover contacts Load capacity AC DC 24 V 1.6 A. Two connections for power supply. Code keypad as an access control system with a capacitive and therefore wear-free keypad. No noticeable wear on frequently used number combination. Stand-alone device or in combination with the Gira door communication system as a door call system for buildings with several residential units. Special key "C": Delete an incorrect entry. Special button "key": Direct door opening after entering the correct code. Special button "Bell": Targeted selection of home stations in large objects. Special button "F": Switching functions with switching actuators from the Gira door communication system. Homogeneous blue LED lighting of the numbers and special characters at night. Master PIN number on the enclosed sealed security card in case of loss of the administrator PIN number. The code keyboard can manage up to 255 codes. Up to 32-digit codes possible. Acoustic feedback when keys are pressed. 3-color LED status display during programming and during operation. Warning tone if the keyboard attachment is removed without authorization to detect sabotage. Tamper circuit with switching actuator in the Gira door communication system. Two different codes can be assigned to the two integrated changeover relays, e.g. B. Code 1: door opening, Code 2: switching on the outside light. Inputs and outputs: connector strip connecting cable for Gira door communication system. Notes: The Keyless In devices can be connected to the Gira HomeServer with the TKS-IP gateway. This makes intelligent connections possible. For example, B. temporary or one-time access authorizations can be easily granted. All data, including access authorizations, can then be managed centrally and flexibly via the Gira HomeServer. Integration into profile 55 possible. The Gira AppShop is the marketplace for...
