Cable dispenser up to 190kg L250-swor load capacity 190kg, A load-dependent, maintenance-free automatic brake brings the device to a stop after a short, controlled overrun if the cable pull is interrupted. The unrolling brake always adjusts its braking effect on light core cables as well as on heavier cable drums according to the weight at the moment and takes into account that, for example, a heavy drum becomes lighter when unrolling. The device enables trouble-free work in any direction, without a watcher and without cable tangles, thanks to an adjustable gap between the dome and the rotating plate, a very light and almost empty cable drum is held on the device without tipping down. At the same time, this adjustable gap makes it much easier to attach the cable drum. To do this, the LITEC® 250 POCKET is hung into the opening of the lying drum with the appropriately adjusted gap. Then the drum is simply set up using the dispenser that is now hanging on the cable drum
