LED light carrier ws G2 491 40S/840 PSD 4MX850 66744499 Illuminant LED not interchangeable, With illuminant, Suitable for number of illuminants 1, Other socket, Housing material steel, Housing color white, Type of voltage AC/DC, Rated voltage 220 ... 240V, LED -Rated current at constant current 116 ... 126mA, control gear LED control gear, current-controlled, with control gear, DALI dimming, light distributor diffuser lens/optics/panel, reflector without, light distribution asymmetrical, light emission direct, beam angle narrow beam 11-20°, rated service life L70/ B50 at 25 °C 70000h, rated service life L80/B50 at 25 °C 50000h, rated service life L90/B50 at 25 °C 25000h, degree of protection (IP) IP20, protection class I, glow wire test according to IEC 60695-2-11 650 °C - 30 s, Max. system power 27.5W, rated luminous flux according to IEC 62722-2-1 4000lm, light color white, color temperature 4000 ... 4000K, color rendering index CRI 80-89, power factor 0.9, width 63mm, height/depth 50mm, length 1478mm, Type of Wiring termination, 5 poles, conductor cross-section 0.5mm², connection type other, customers from industry and retail are looking for general lighting solutions that pay for themselves in a reasonable time and that meet all relevant standards for supermarkets and industrial applications. Maxos LED is associated with limited investment costs, allows considerable energy savings (up to 55% compared to fluorescent lamp systems with LLCG) due to the high efficiency of up to 133 lm/W and at the same time achieves the required illuminance with the required color rendering and glare control. The minimalist Maxos LED light carrier, in which a wide or narrow beam lens optic is integrated, can be easily integrated into existing mounting rails of the Maxos continuous-row lighting system. Maxos LED is also available with a double asymmetrical optic, which is ideal for use in retail aisles. There are two versions regarding the lumen package. Firstly, the variant (LED40S) with 4,000 luminaire lumens, which can be used as a direct 1:1 replacement for existing light sources with a 1x58 W or 1x49 W fluorescent lamp and reflector. There is also an LED light carrier with 5,500 and 6,600 lumens (LED55S/66S) that can be used for new systems. Compared to conventional fluorescent lamp systems, this extremely efficient LED solution can pay for itself in less than three years.
