DuoFern multiple wall button ultra white 9494-2 radio frequency 434.5MHz, range 30m, wireless button flush-mounted, protection class (IP) IP30, power supply 230 V AC, the DuoFern multiple wall button 230 V is a wireless wall button for operating DuoFern devices and directly connected electrical consumers. The multiple wall button has 3 rockers, each with 2 buttons. Up to 8 DuoFern radio devices can be registered on each of the 3 rockers. With the DuoFern multiple wall switch, up to 24 DuoFern devices can be operated in 3 groups. And thanks to the integrated labeling field, you always have an overview. In addition, the DuoFern multiple wall switch 230 V is also ideally suited to converting an existing switching point to radio. Because the wireless pushbutton has an integrated switching actuator. The consumer connected to this switching actuator can still be operated manually using the upper rocker switch, but can now also be remotely operated by radio. If you do not want this direct connection, the rocker switch can be detached from the switching actuator by simply pressing a button. This gives you the option of operating the connected consumer completely independently of the rocker switches. Also particularly practical: the multiple wall button is designed in accordance with DIN 49075 and can be integrated into all common switch ranges using intermediate frames. In addition, the multiple wall button has lighting that can be adjusted in 4 stages. So you can always find your way to the button, even in the darkest of situations.
