Weather station Climatronic 1002662 Other bus systems other, multiple sensor design, surface-mounted installation, with bus coupling, with DCF77, with heating, color grey, RAL number (similar) 9006, number of binary inputs 0, weather station, protection class (IP) other, weather station for the WAREMA climatronic® system. It records the weather data brightness, twilight, wind speed, wind direction, precipitation, time and outside temperature, which it makes available to the system. With the built-in photo sensors, the brightness can be recorded for 4 cardinal directions. The wind is measured without mechanical moving parts using heated flow sensors. The current time is always supplied by the DCF77 radio clock receiver. The communication and power supply with 24 V DC takes place via a 4-wire bus line. Up to 3 weather stations can be connected to the WAREMA climatronic®. Can be mounted on the wall, ceiling or standpipe. The maximum cable length between the weather station and the control cabinet is 150 m. Note: An external power pack is required (depending on the system size, one or more power packs are required).
