The possible uses of the 3LD3 line disconnectors are diverse. After disconnection from the mains, they ensure that all electrical equipment is safely isolated, switching, for example, three-phase motors, but also air conditioning and ventilation systems. 3LD3 are also predestined for the use of control or switching cabinets, especially for applications in small machines (e.g. saws, compressors, pumps, cement mixers, drills, milling machines and woodworking machines). The main features of the Siemens 3LD main and emergency stop switches are: 1. Modular design, quick and easy installation of auxiliary switches, N-PE terminal or 4th pole. 2. Versatile in use thanks to local approvals. 3. One mechanical size for five electrical sizes. 4. Can be used for direct current applications. 5. Types of mounting: front mounting, mounting plate, DIN rail. 6. Optimum mains separation from 16 A to 63 A thanks to the lockable rotary drive. For the safe, efficient electrical infrastructure in buildings and industry, Siemens offers a comprehensive portfolio of protective switching, measuring and monitoring devices, distribution systems, switches and socket outlets.
