Mains monitoring DUW-C12 3x230V 1-phase undervoltage possible, 3-phase undervoltage possible, voltage measuring range 1 195 ... 400V, rated control supply voltage  $U_s$  at AC 50 Hz 230 ... 400V, response value voltage 195 ... 195V, number of contacts as NC contact 0, number of contacts as NO contact 0, number of contacts as changeover contact 2, width 30mm, height 71mm, depth 65mm, undervoltage monitoring in three-phase networks (each phase against neutral conductor) with a fixed threshold value, fixed hysteresis and integrated test button. It was specially developed for emergency lighting systems according to DIN VDE 0108. The device can also be used to monitor a single phase. All unused inputs must be connected to the connected phase. If there is a reverse voltage caused by the consumer that is greater than the set threshold value, no error message is output. Good message: Relay is activated (contacts 11-14 and 21-24 closed), LED is off. Error message: Relay has dropped out (contacts 11-14 and 21-24 open), LED is on.
